

Industry 4.0

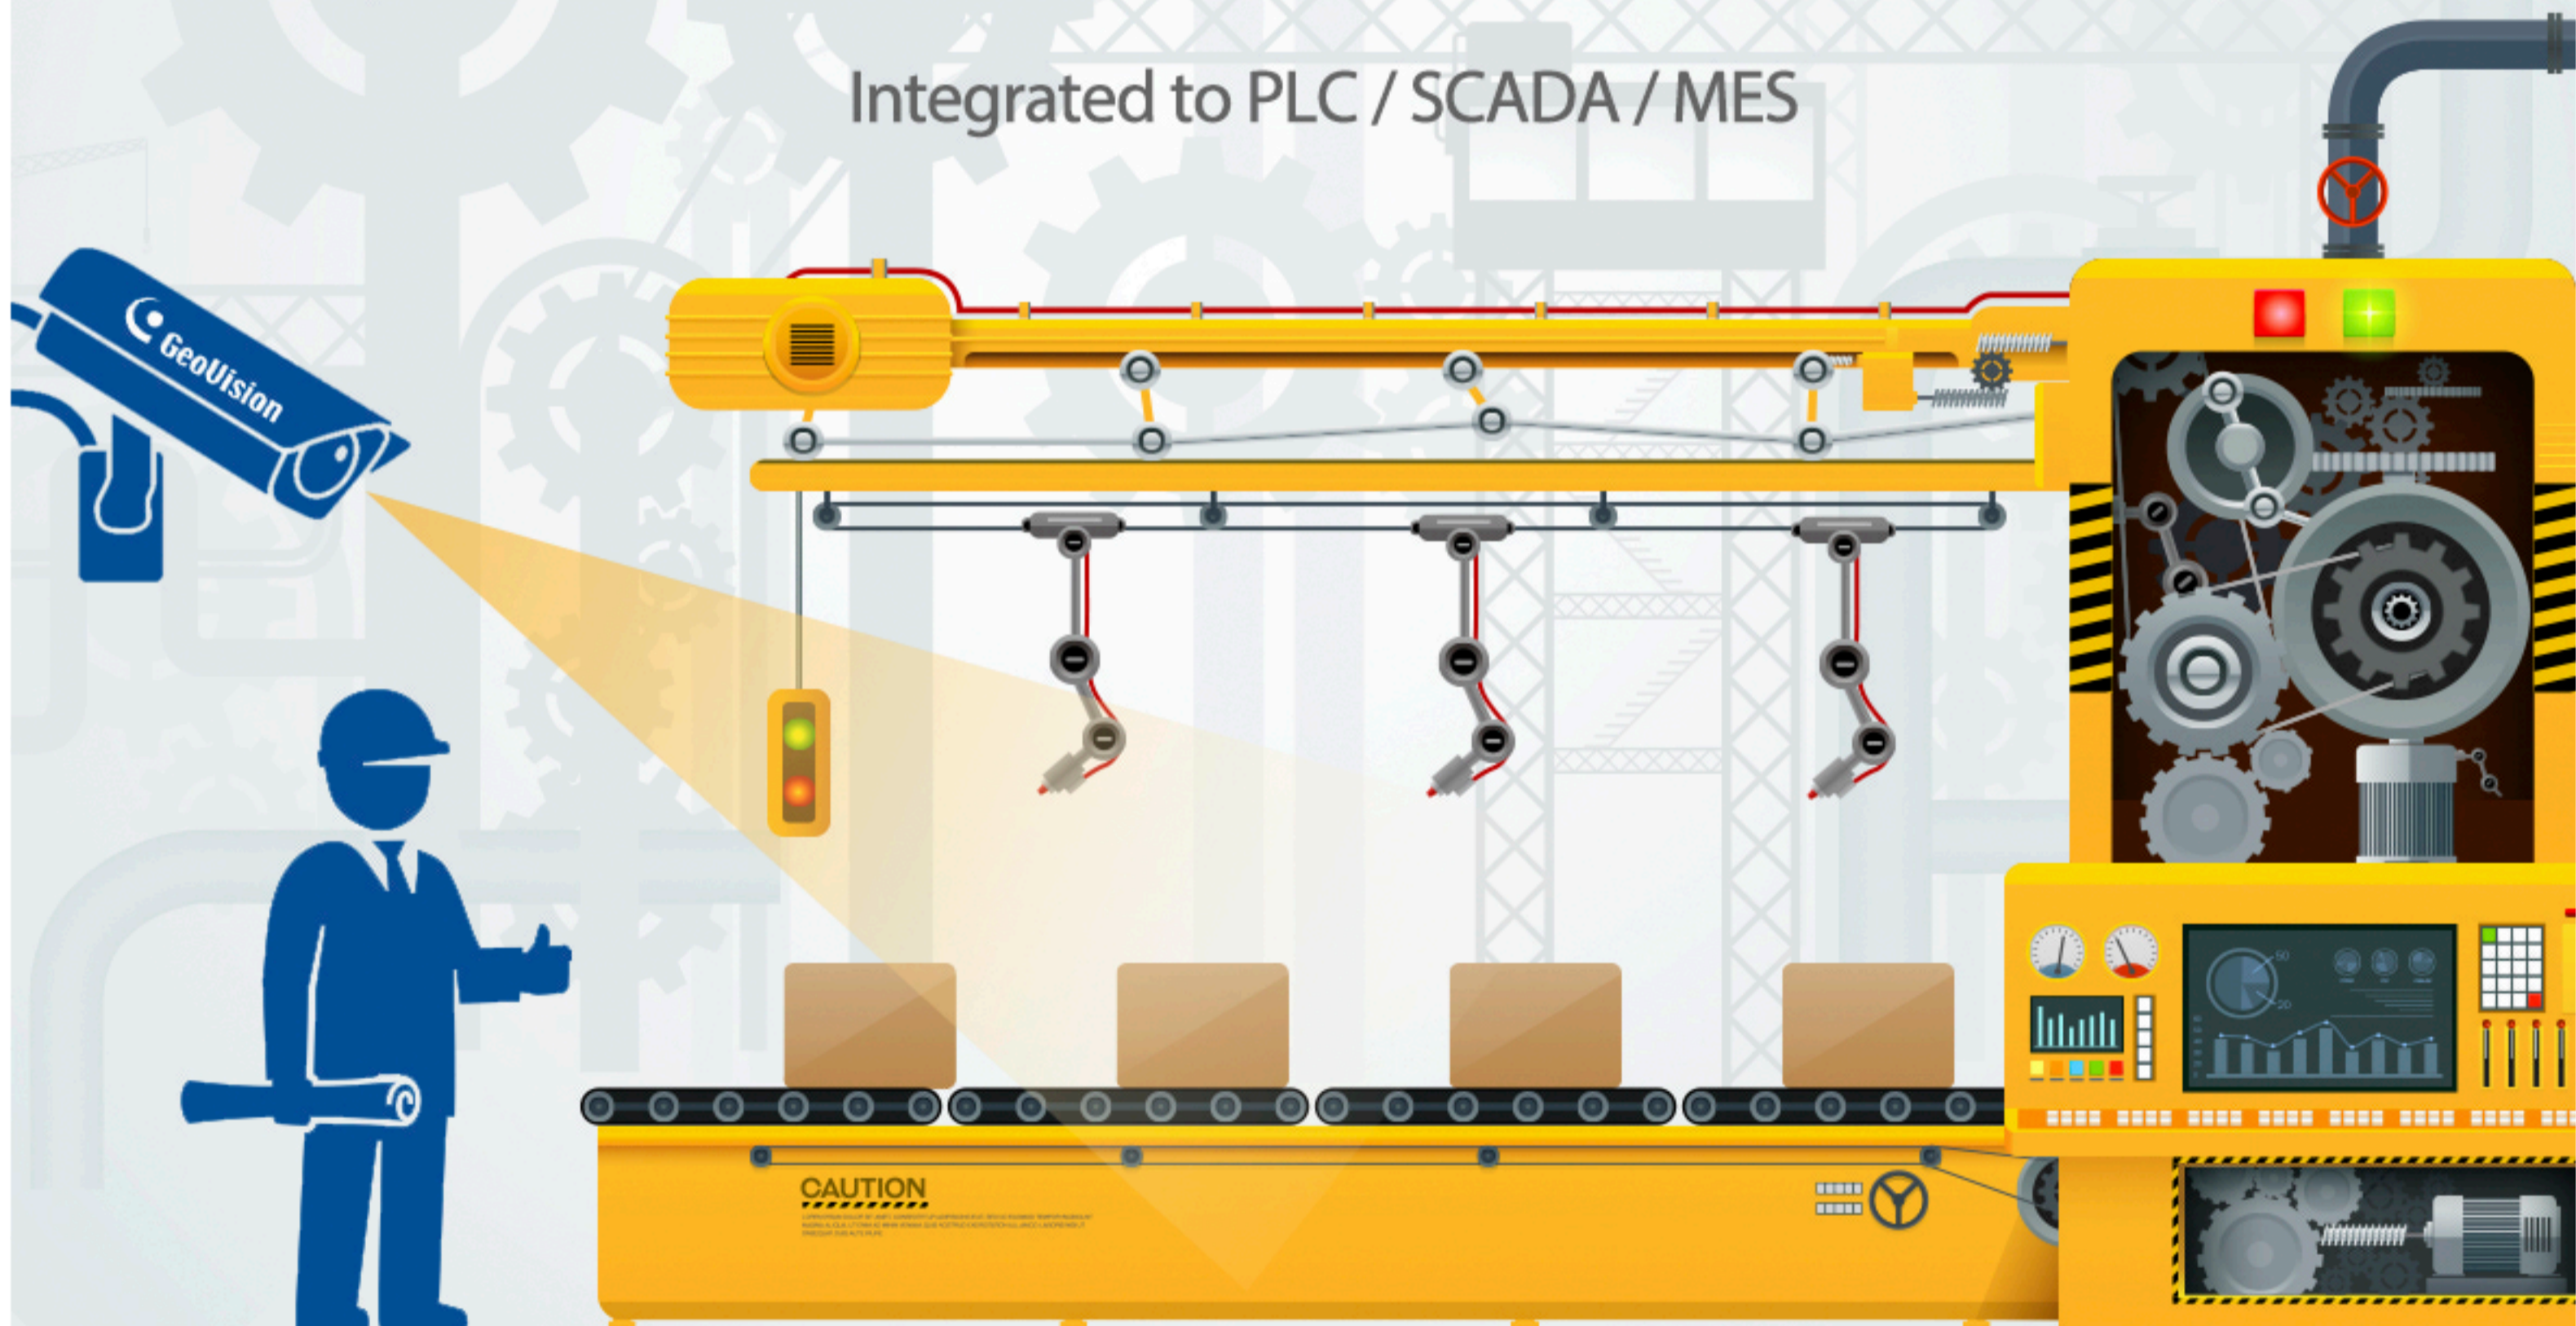

Where Machine Vision Has Helped?

Read multiple 1D or 2D barcodes in seconds

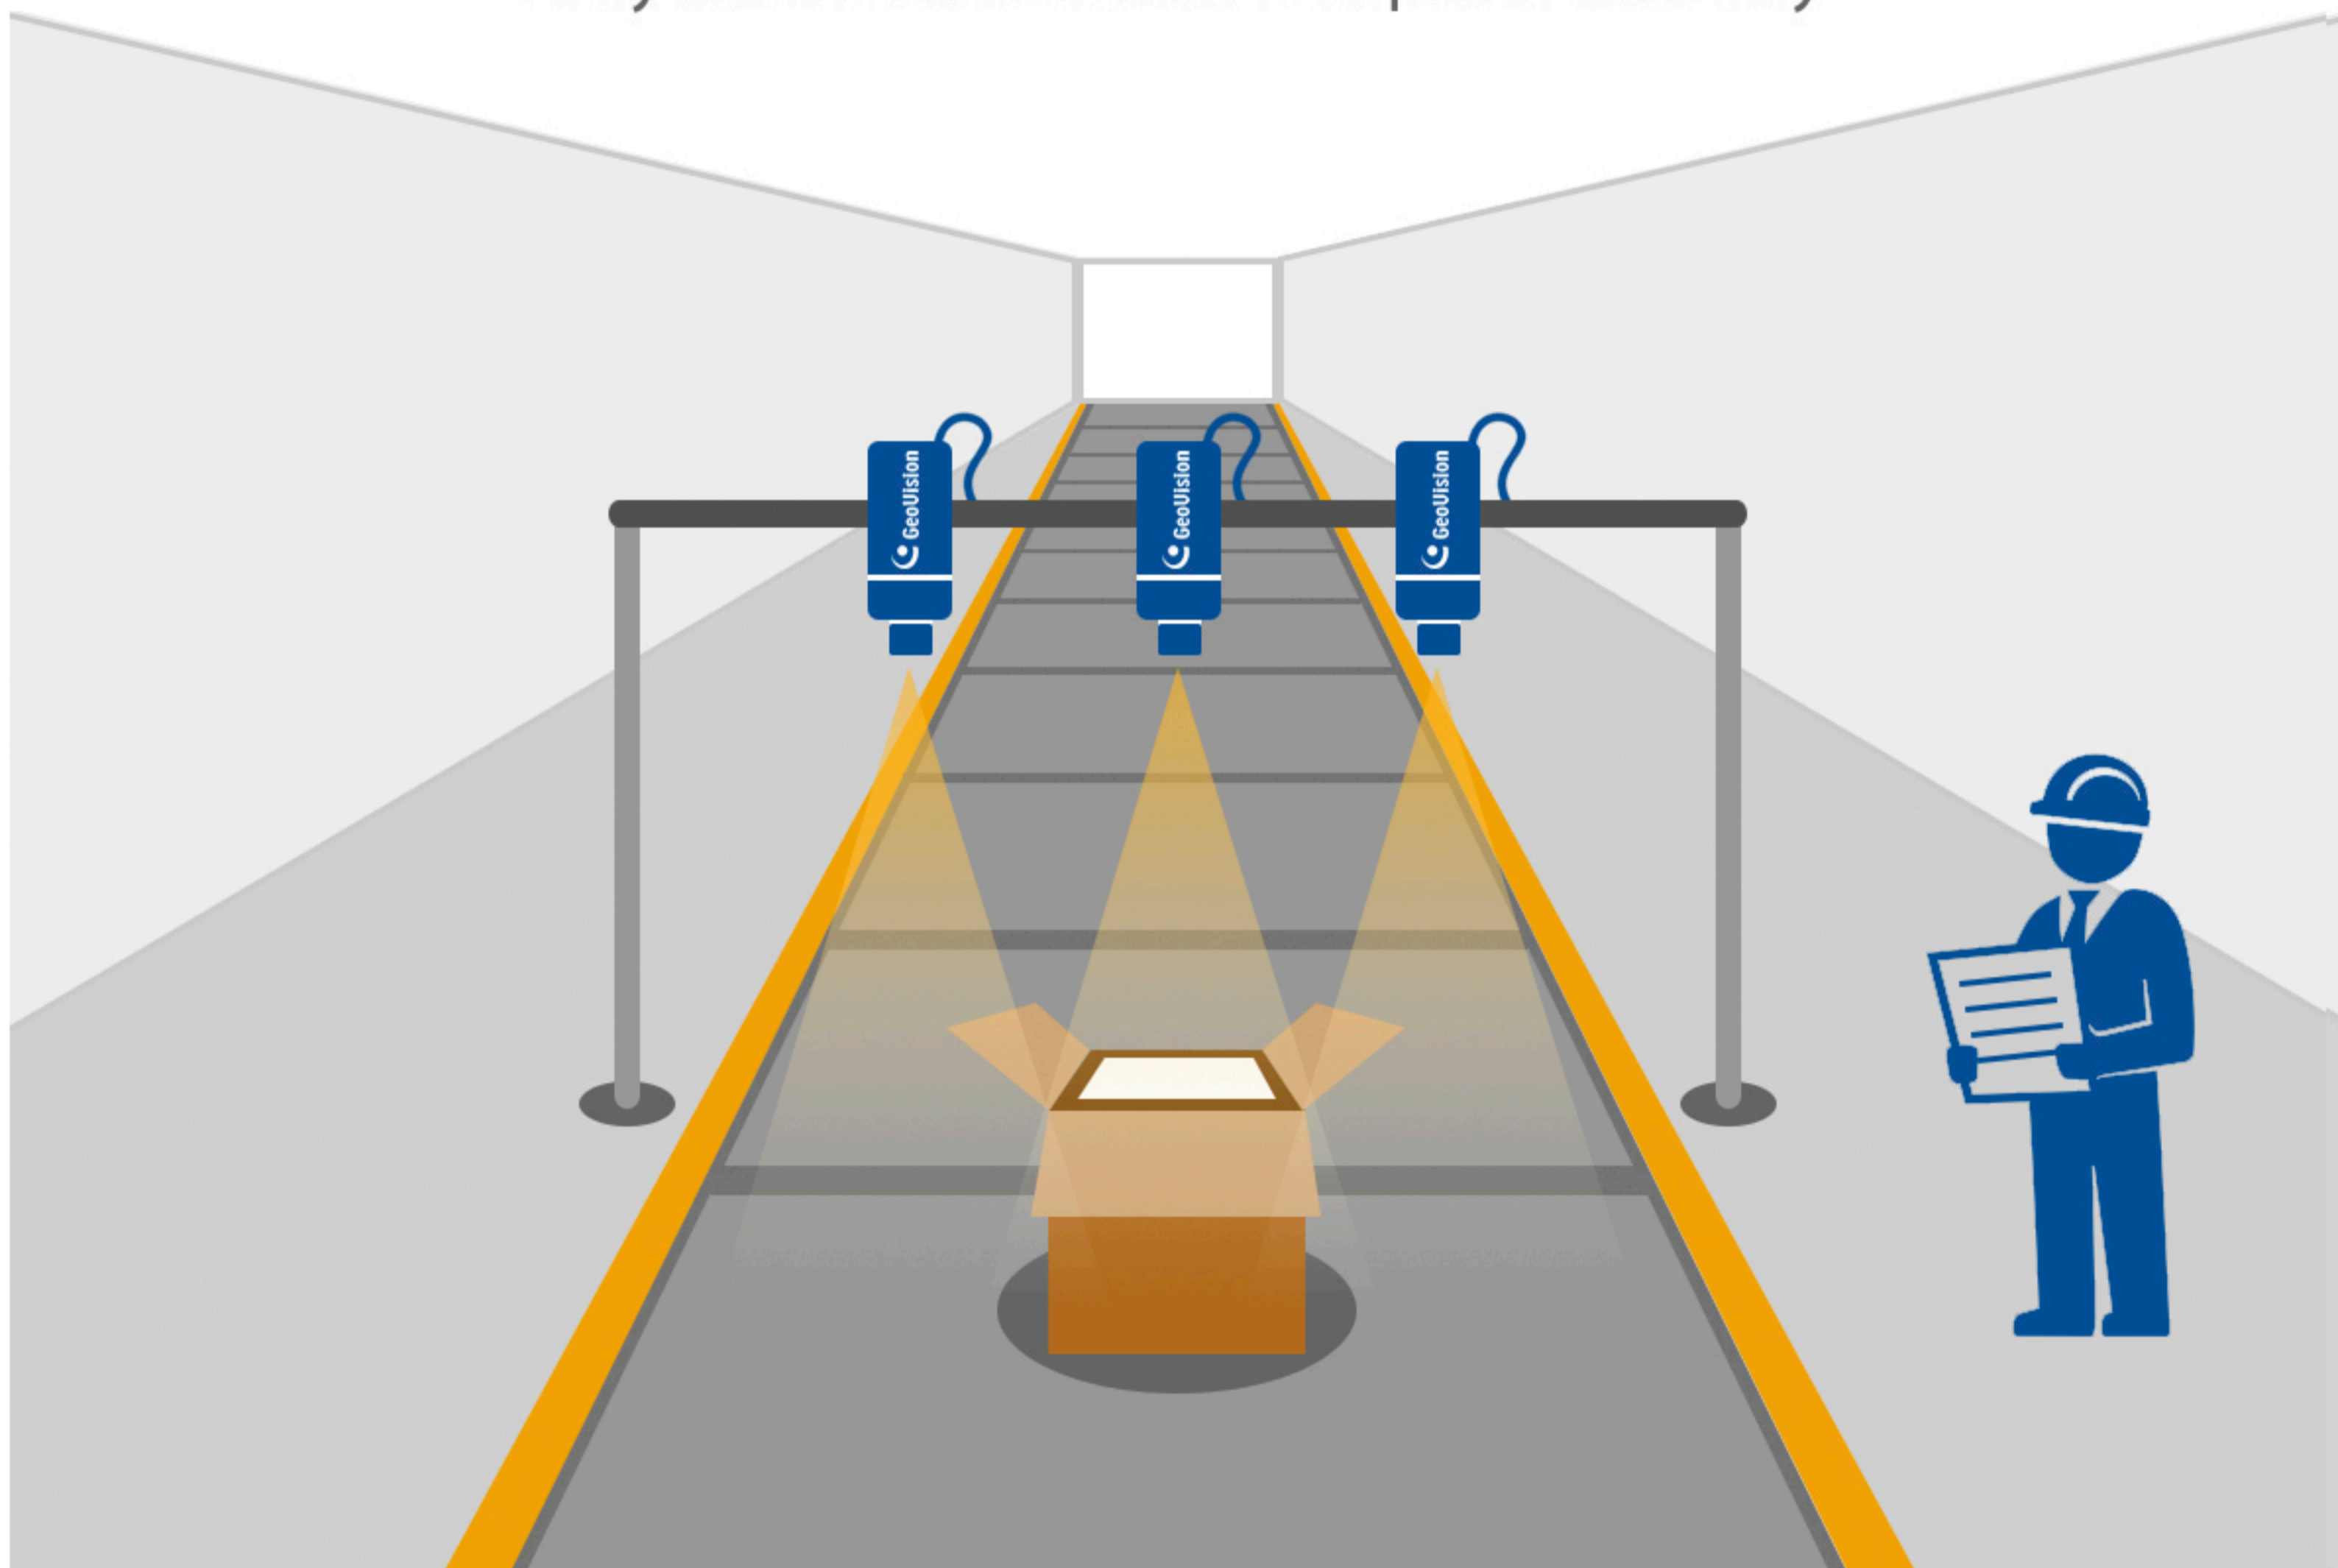

Inspect Optically Throughout Manufacturing Process

Integrated to PLC / SCADA / MES

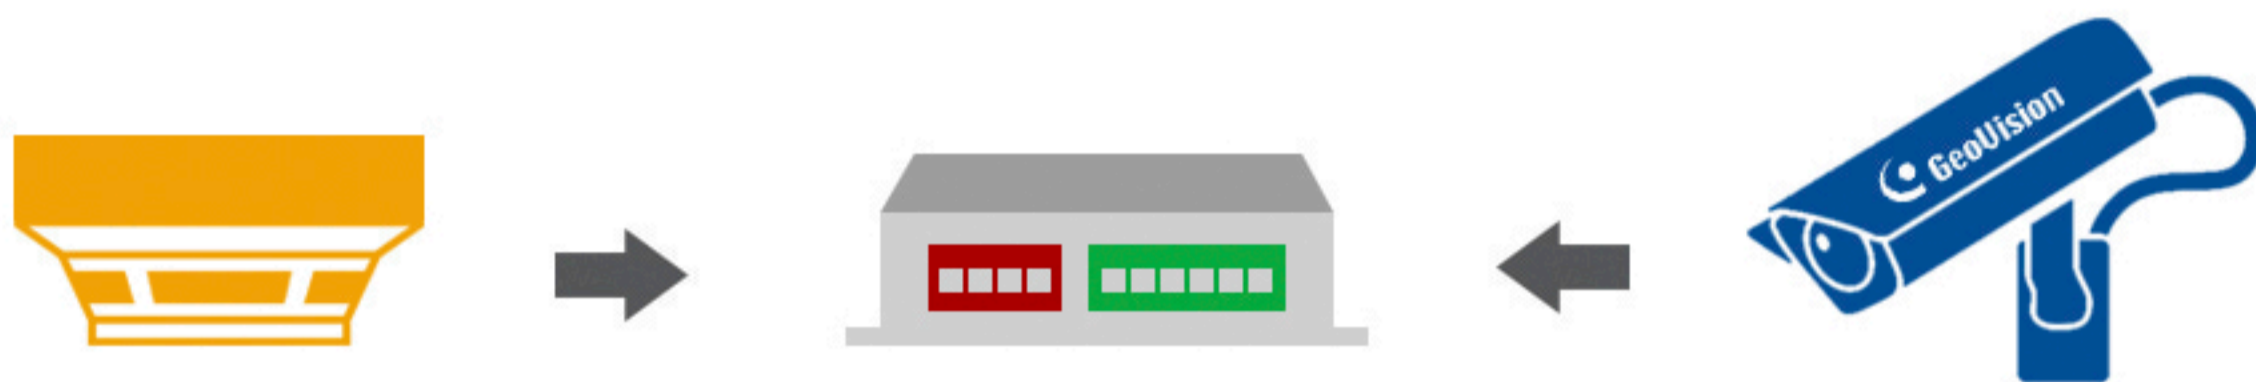

Consistent Packing

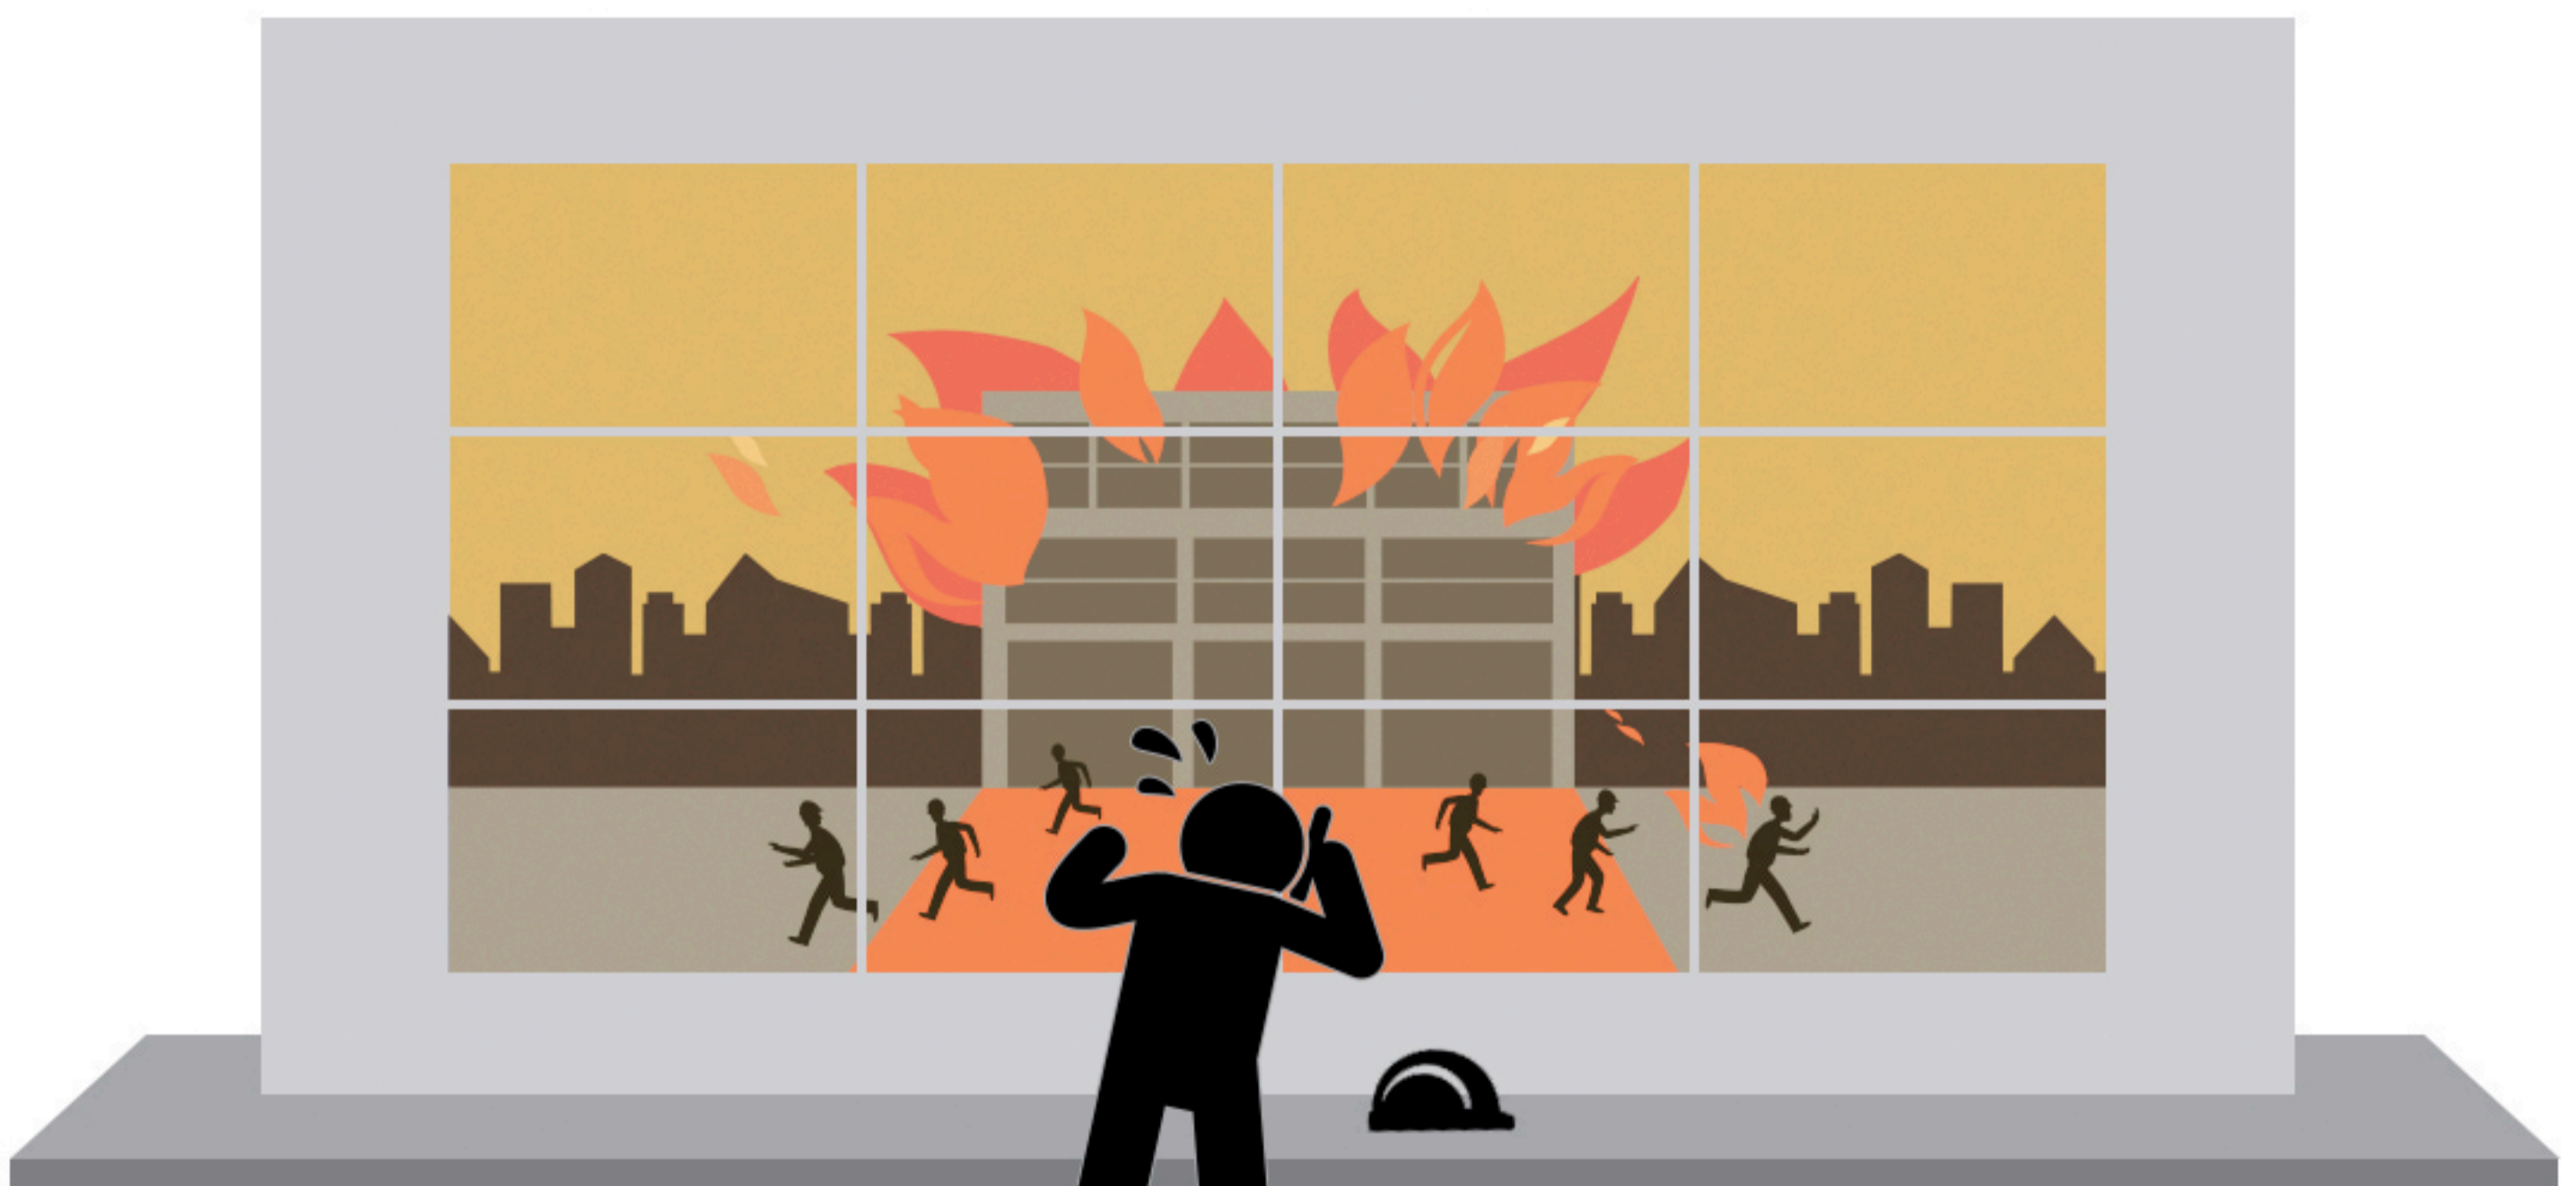

Verify the correct orientation of a part or assembly

Managed From A Single Point

Combined with various I/O devices, send instant alerts and images to control room

Triggering Alerts and Recording for Verification

Help in objective inspection of non-measurable condition

Support
OPC UA
Protocol

Flaw Detection

Look for pattern changes and help to sort out defective parts early
